## TEXAS NATURAL RESOURCE CONSERVATION COMMISSION

*Protecting Texas by Reducing and Preventing Pollution*

March 16, 1998

**CERTIFIED MAIL**  
**RETURN RECEIPT REQUESTED**

Robert Damesworth, Mayor  
City of Leonard  
P.O. Box 1270  
Leonard, TX 75452

Honorable Mayor Damesworth:

The Texas Natural Resource Conservation Commission (TNRCC), under contract to the United States Environmental Protection Agency (EPA) to perform Screening Site inspections, has been investigating the Frank J. Doyle Transformer facility located at 305 East Cottonwood Street, Leonard, Texas. This site is located within your community, and currently the TNRCC/EPA are determining if there has been a, "release or substantial threat of release into the environment of any pollutant or contaminant which may present an imminent and substantial danger to the public health or welfare".

Enclosed are the results of well water samples (GW-01, GW-02 and GW-03) collected from City Municipal Wells No. 1 and No. 2 as a part of the EPA/TNRCC inspection conducted on January 13, 1998. The TNRCC and the Texas Department of Health (TDH) have reviewed these results and do not consider the levels to pose any health threat.

Please do not hesitate to contact us should you have questions. You may call (817) 469-6750 and speak to J. D. Thompson of my staff. Thank you for your assistance with this inspection.

Sincerely,

  
Wesley G. Newberry, Unit Manager  
Superfund Site Discovery and Assessment Program  
Site Assessment Section  
Pollution Cleanup Division
